

Department of B.Sc Information Technology

About the Department

The Department of B.Sc Information Technology was established during the academic year 2010-2011. The aims at imparting quality education in Computer Science and Information Technology through various undergraduate programmes. It offers an environment for the students to nurture their creativity and develop real time applications in various advanced areas of Computer Science and Information Technology. The Department mainly focuses on the wholesome development of the graduate i.e. their intellectual, moral and spiritual wellbeing to excel in education, research and service. Students have to prepare a project work/module during the final semester. The students will be provided exposure by way of industrial visits, training and educational trips.

Vision

- ✚ Train young minds in the field of recent technologies through education, research and industry-institute interaction to serve society, the nation and beyond.

Mission

- ✚ Empower students with computational and logical skills to become leaders of globalised technologies.

Department Activities

- ❖ Organizing Guest Lectures on Web Technology and Cloud Computing
- ❖ Organizing Industrial visits
- ❖ Organizing Seminars / Workshops
- ❖ Motivating students in participating competitions in other Colleges / Institutions.
